Year 6 Pegasus Class	**Fallen Fields**	**Cycle A 2020-2021 Term 2**	St Peter's PRIMARY SCHOOL

		History	**Geography**	**Music**	**Art and Design**	**Design Technology**	**Computing**
Programme of Study		Understand historical concepts such as continuity and change, cause and consequence, similarity, difference and significance, and use them to make connections, draw contrasts, analyse trends, frame historically valid questions and create their own structured accounts, including written narratives and analyses.	Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied.	Play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression.	Learn about great artists, architects and designers in history.	Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities.	Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content. Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.

	History	Geography	Music	Art and Design	Design Technology	Computing
Year 6 Learning Intention (skills)	Describe the causes and consequences of a significant event in history Debate the significance of a historical person, event, discovery or invention in British history	Use satellite imaging and maps of different scales to find out geographical information about a place.	Use gesture and expression to create a finished, polished performance	Compare and contrast artists' use of perspective, abstraction, figurative and conceptual art.	Choose the best materials for a task, showing an understanding of their working characteristics.	Select, use and combine a variety of software, including internet services, to meet a goal. Critically evaluate search engine results and identify factors that may affect ranking, such as how long the site has existed, the number of links to the site and whether the organisation has paid to have their site promoted.

	History	Geography	Music	Art and Design	Design Technology	Computing
Year 6 Knowledge	The causes of significant events can be long-term and revolve around set ideologies, institutions, oppression and living conditions or short-term, revolving around the immediate motivations and actions of individuals or groups of people. These long- and short-term causes can lead to a range of consequences for individuals, small groups of people or society as a whole. Significant people, events, discoveries or inventions can affect many people over time. Examples include the invasion of a country; transfer of power; improvements in healthcare; advancements in technologies or exploration.	Satellite images are photographs of Earth taken by imaging satellites.	Gestures in music include eye contact, waving and beckoning to the audience, closing eyes to show emotion or exaggerated movements, such as a flourish at the end of a piece or movement away from the microphone. Some gestures are associated with different types of music, such as exaggerated movements to the pulse of the music and virtuoso guitar playing during rock musical performances. Expression in music means adding feeling and is indicated in musical scores using words, such as dramatico (in a dramatic, exaggerated style), legato (smoothly and connected), tranquillo (quiet and peaceful) and cantabile (in a singing or flowing style).	Perspective is the representation of 3-D objects on a 2-D surface. Abstraction refers to art that doesn't depict the world realistically. Figurative art is modern art that shows a strong connection to the real world, especially people. Conceptual art is art where the idea or concept behind the piece is more important than the look of the final piece.	It is important to understand the characteristics of different materials to select the most appropriate material for a purpose. This might include flexibility, waterproofing, texture, colour, cost and availability.	A variety of software, such as word processing software, image editing software or internet services, can be selected, used and combined to meet a goal. Search engines take many factors into account, such as the quality of the site, number of updates or number of matches to keywords. However, search engines do not consider whether the content is true, age-appropriate or relevant, and so users need to be aware of these things when searching.
